

# LaTeX Class `yb-book`<sup>\*</sup>

Yegor Bugayenko  
[yegor256@gmail.com](mailto:yegor256@gmail.com)

2025/02/02, 0.6.3

## 1 Introduction

The provided class `yb-book` helps me design [my books](#) and publish them [on Amazon](#). You are welcome to use it for your own books. It is as simple as this:

```
\documentclass{yb-book}
\renewcommand*\thetitle{New Book About OOP}
\renewcommand*\theauthor{Jeff Lebowski}
\renewcommand*\thevolume{1}
\renewcommand*\theversion{1.0}
\begin{document}
\ybPrintTitlePage
\chapter{First One}
\section{About Something Interesting}
Hello, world!
\end{document}
```

You are welcome to suggest additional options and commands, but the style of my books is intentionally as simple as possible, avoiding formatting as much as possible. Here is [why](#).

## 2 Options

There are a few class options you can use:

`compact` Use this package option when you need to make text more compact and take less vertical space. This may be convenient fiction books. I use this option to render [Code Ahead](#) book.

`sparse` With this package option every section will start from a new page.

---

\*The sources are in GitHub at [yegor256/yb-book.cls](https://github.com/yegor256/yb-book.cls)

`manuscript` When the format is not for Amazon printing, but for some other purposes (the page size is A4), this option may be convenient. I also use it when I want the book to be rendered for printing on paper for review purposes.

`authordraft` When it's a draft for reviewers (the page size is A4) and you want to have a watermark and a compact form of the content. This option goes together with `\therewviewer{}` command, which you may redefine, in order to embed the name of the reviewed in the watermark. This may help you prevent theft of your book:

```
\documentclass[authordraft]{yb-book}
\renewcommand*\therewviewer{Walter Sobchak}
\begin{document}
Hello, world!
\end{document}
```

### 3 Meta Commands

There are a number of commands that you may redefine in the preamble:

```
\documentclass{yb-book}
\newcommand*\thetitle{My New Book About OOP}
\newcommand*\theauthor{Yegor Bugayenko}
\newcommand*\thevolume{1}
\newcommand*\thedate{24 Feb 2022}
\newcommand*\theversion{1.4}
\newcommand*\therewviewer{Jeff Lebowski}
\begin{document}
... the content goes here ...
\end{document}
```

### 4 Printers

There are a number of printers — commands that print large blocks of text in the expected format:

`\ybPrintTitlePage` Prints the first page of a book. It expects at least `\thetitle` and `theauthor` to be defined:

```
\documentclass{yb-book}
\renewcommand*\thetitle{My New Book}
\renewcommand*\theauthor{Yegor Bugayenko}
\begin{document}
\ybPrintTitlePage
... the rest of the book goes here
\end{document}
```

`\ybPrintTOC` Prints the table of contents.

`\ybQuote` Prints a side quote:

```
\documentclass{yb-book}
\begin{document}
Hello, world!
\end{document}
```

```
\ybQuote{Never tell the truth to people who
    are not worthy of it}{Mark Twain}{}
\end{document}
```

`\ybPrintBibliography` Prints the list of bib references.

`\ybPrintIndex` Prints index with an optional name of the section (instead of “Index”):

```
\documentclass{yb-book}
\begin{document}
Hello, world!
\ybPrintIndex{Recommended Books}
\end{document}
```

## 5 Implementation

First, we parse package options:

```
1 \RequirePackage{pgfopts}
2 \pgfkeys{
3   /yb/.cd,
4   apa/.store in=\yb@apa,
5   authordraft/.store in=\yb@authordraft,
6   compact/.store in=\yb@compact,
7   manuscript/.store in=\yb@manuscript,
8   sparse/.store in=\yb@sparse,
9 }
10 \ProcessPgfPackageOptions{/yb}
```

Then, depending on the options like `authordraft` and `manuscript`, we preset options of the class `book` and then load it:

```
11 \makeatletter
12 \ifdefined\yb@authordraft
13   \PassOptionsToClass{11pt}{book}
14   \PassOptionsToClass{oneside}{book}
15 \else
16   \ifdefined\yb@manuscript
17     \PassOptionsToClass{12pt}{book}
18     \PassOptionsToClass{oneside}{book}
19 \else
20   \PassOptionsToClass{11pt}{book}
21   \PassOptionsToClass{twoside}{book}
22 \fi
23 \fi
24 \makeatother
25 \LoadClass{book}
```

Then, we load `inputenc` for UTF-8 encoding of the sources:

```
26 \RequirePackage[utf8]{inputenc}
```

`geometry` Then, using `geometry`, we setup page layout:

```
27 \RequirePackage{geometry}
28 \geometry{
29   paperwidth=6in, paperheight=9in,
30   bindingoffset=0.25in,
```

```

31   left=0.75in, right=0.75in, top=0.75in, bottom=1.25in}
32 \makeatletter
33 \ifdefined\yb@authordraft
34   \geometry{a4paper, margin=1in, left=1.5in}
35 \else
36   \ifdefined\yb@manuscript
37     \geometry{a4paper, margin=1.2in}
38 \fi
39 \fi
40 \makeatother

```

Then, we load `href-ul` to underline links correctly:

```
41 \RequirePackage{href-ul}
```

Then, we load `anyfontsize` to enable all sizes of fonts:

```
42 \RequirePackage{anyfontsize}
```

Then, we load `tikz` for graphics:

```

43 \RequirePackage{tikz}
44 \usetikzlibrary{positioning}
45 \usetikzlibrary{shapes}
46 \usetikzlibrary{fit}

```

Then, we load `chngcntr` for something else:

```

47 \RequirePackage{chngcntr}
48 \counterwithout{footnote}{chapter}

```

Then, we load `lastpage` to enable rendering of the last page number:

```
49 \RequirePackage{lastpage}
```

Then, we load `paralist` for inline enumeration:

```
50 \RequirePackage{paralist}
```

Then, we load `xcolor` for colors:

```
51 \RequirePackage{xcolor}
```

Then, we load `graphicx` to enable graphic files inclusion:

```
52 \RequirePackage{graphicx}
```

Then, we load `enumitem` for inline enumeration:

```

53 \RequirePackage[inline]{enumitem}
54 \setlist{nosep}

```

Then, we load `float` for floating figures:

```
55 \RequirePackage{float}
```

Then, we load `ulem` for inline lists:

```
56 \RequirePackage[normalem]{ulem}
```

Then, we load `xfp` and `xifthen` for if-then-else:

```

57 \RequirePackage{xfp}
58 \RequirePackage{xifthen}

```

Then, we load `soul` for highlighting:

```
59 \RequirePackage{soul}
```

Then, we load `csquotes` for better rendering:

```
60 \RequirePackage[autostyle=try]{csquotes}
```

\pagestyle Then, we set the layout of a page to plain:

```
61 \pagestyle{plain}
```

**setspace** Then, using **setspace** package we set the spacing between lines in the text, depending on the package options:

```
62 \RequirePackage{setspace}
63   \setstretch{1.2}
64   \makeatletter
65   \ifdefined\yb@compact\setstretch{1.0}\fi
66   \ifdefined\yb@manuscript\setstretch{1.1}\fi
67   \ifdefined\yb@authordraft\setstretch{1.4}\fi
68   \makeatother
```

**biblatex** Then, we configure **biblatex**, for citation management:

```
69 \PassOptionsToPackage{indexing=cite,
70   natbib=true,maxnames=2,minnames=1,doi=true,
71   url=false,isbn=false,isbn=false}{biblatex}
72 \makeatletter
73 \ifdefined\yb@apa
74   \PassOptionsToPackage{style=authoryear}{biblatex}
75 \else
76   \PassOptionsToPackage{style=numeric}{biblatex}
77 \fi
78 \makeatother
79 \RequirePackage{doi}
80 \RequirePackage{biblatex}
81   \DeclareCiteCommand{\citetitle}
82     {\boolfalse{citetracker}%
83      \boolfalse{pagetracker}%
84      \usebibmacro{prenote}%
85      \ifcriteindex
86        {\indexnames{labelname}%
87         {}%
88        \printfield[citetitle]{labeltitle}%
89        \multicitedelim%
90        \usebibmacro{postnote}%
91      \DeclareCiteCommand*\{\citetitle}
92        {\boolfalse{citetracker}%
93         \boolfalse{pagetracker}%
94         \usebibmacro{prenote}%
95         \ifcriteindex
96           {\indexnames{labelname}%
97            {}%
98            \printfield[citetitle]{title}%
99            \multicitedelim%
100           \usebibmacro{postnote}}
```

**condensed** Then, we define **condensed** environment for snippets (**lsstyle** is defined by **letterspace** in **microtype**):

```
101 \newenvironment{condensed}
102   {\begingroup\setstretch{1.0}\lsstyle}
103   {\endgroup}
```

`microtype` Then, we include `microtype` for better rendering:

```
104 \makeatletter
105 \ifdefined\yb@authordraft\else
106   \PassOptionsToPackage{letterspace=-50,nopatch=footnote}{microtype}
107   \RequirePackage{microtype}
108 \fi
109 \makeatother
```

`libertine` Then, we include `libertine`, for a good looking font:

```
110 \makeatletter
111 \ifdefined\yb@manuscript
112   \RequirePackage[tt=false,type1=true]{libertine}
113 \fi
114 \makeatother
```

`\section` Then, we redefine `\section` command:

```
115 \makeatletter
116 \let\yb@oldsection\section
117 \def\yb@secstart{\ifdefined\yb@sparse\newpage\fi}
118 \ifdefined\yb@authordraft
119   \RequirePackage[medium]{titlesec}
120 \else
121   \RequirePackage[raggedright]{titlesec}
122   \titlespacing{\section}{0in}{6pt}{6pt}[1in]
123   \renewcommand\section{\yb@secstart\yb@oldsection}
124 \fi
125 \ifdefined\yb@compact
126   \renewcommand\section{\yb@secstart\vspace{2em}\yb@oldsection}
127 \fi
128 \makeatother
```

Then, if it's a `authordraft`, we put a watermark comment:

```
129 \makeatletter
130 \ifdefined\yb@authordraft
131   \RequirePackage[absolute]{textpos}
132   \TPGrid{16}{16}
133   \RequirePackage{fancyhdr}
134   \pagestyle{fancy}
135   \renewcommand\headrulewidth{0pt}
136   \renewcommand\footrulewidth{0pt}
137   \setlength{\headheight}{16pt}
138   \fancyhf{}
139   \fancyhead[L,C,LO,CO]{}
140   \fancyhead[R,RO]{}
141   \begin{textblock}{16}[0.5,0.5](8,8)%
142     \tikz \node[minimum width=16\TPHorizModule] {%
143       \fontsize{64}{64}\selectfont\bfseries%
144       \rotatebox{45}{%
145         \tikz \node
146           [fill=gray!6, font=\ttfamily\color{white}]
147           {it is a draft};%
148       }%
149     };%
150   \end{textblock}%

```

```

151 \begin{textblock}{4}(11.5,1)%
152   \tikz \node [color=gray, rotate=270,
153     font=\ttfamily\scriptsize, text width=8in] at (0,0) {%
154       Copyright \textcopyright{} \the\year{} by \theauthor{}.
155       All rights reserved. No part of the contents of
156       this book may be reproduced or transmitted in any
157       form or by any means without the written permission
158       of the publisher. This particular manuscript is
159       printed for \textbf{\therewiewer{}} and may be used only
160       for one-time review. The manuscript has to be destroyed
161       after the review.%}
162   };
163 \end{textblock}
164 }
165 \fancyfoot[C,CO,C]{\small\ttfamily%
166   page \#\thepage{} of \pageref{LastPage}}
167 \fi
168 \makeatother

```

\maketitle Then, we redefine \maketitle command:

```

169 \renewcommand\maketitle{%
170   {\LARGE\textbf{\thetitle}}
171   \\[1em]
172   by \theauthor{}
173   \\[4em]
174   \ifx\thevolume\empty\else%
175     Volume \thevolume{}\\
176   \fi
177   \ifx\thedate\empty\else%
178     Rendered on \thedate{}
179   \fi
180   \ifx\theversion\empty\else%
181     \\
182     Ver. \theversion{}
183   \fi
184 }

```

\ybPrintTitlePage Then, we define \ybPrintTitlePage command:

```

185 \makeatletter
186 \newcommand\ybPrintTitlePage{%
187   \ifdefined\yb@authordraft\else
188     \begin{titlepage}
189       \ttfamily
190       \vspace*{\fill}
191       \noindent
192       \Huge\thetitle
193       \\[1em]
194       by \theauthor{}
195       \\[4em]
196       \ifx\thevolume\empty\else%
197         Volume \thevolume{}\\
198       \fi
199       \ifx\thedate\empty\else%
200         \thedate{%

```

```

201      \fi
202      \ifx\thedate\empty\else%
203          \\
204          \theversion{}%
205      \fi
206      \vspace*\{\fill}%
207  \end{titlepage}
208 \fi
209 }
210 \makeatother

```

\ybPrintTOC Then, we define `ybPrintTOC` command to print table of contents:

```

211 \makeatletter
212 \newcommand\ybPrintTOC{
213   \ifdefined\yb@authordraft\else
214     \ifdefined\yb@compact\else\cleardoublepage\fi
215     {\setstretch{0.7}\tableofcontents}
216   \fi
217 }
218 \makeatother

```

\ybPrintIndex Then, we configure `imakeidx` package and define `\ybPrintIndex` command:

```

219 \RequirePackage{imakeidx}
220 \renewbibmacro*{citeindex}{\indexnames{\labelname}{}}
221 \makeindex
222 \indexsetup{othercode={\hyphenpenalty=10000}}
223 \makeatletter
224 \newcommand\ybPrintIndex[1] [Index]{%
225   \ifdefined\yb@authordraft\else
226     \cleardoublepage%
227   \%
228     \setstretch{1.0}%
229     \small%
230     \addcontentsline{toc}{chapter}{#1}%
231     \printindex%
232   \%
233   \fi%
234 }
235 \makeatother

```

\ybQuote Then, with the help of `wrapfig` and `mdframed`, we define `\ybQuote` command:

```

236 \RequirePackage{wrapfig}
237 \RequirePackage{mdframed}
238 \RequirePackage{changepage}
239 \strictpagecheck
240 \mdfdefinestyle{quoteodd}{backgroundcolor=black!0,
241   leftmargin=6pt,rightmargin=0pt,
242   innerleftmargin=6pt,innerrightmargin=0pt,
243   innertopmargin=0pt,innerbottommargin=0pt,
244   skipabove=0pt,skipbelow=0pt,
245   linewidth=2pt,
246   topline=false,bottomline=false,rightline=false}
247 \mdfdefinestyle{quoteeven}{backgroundcolor=black!0,
248   rightmargin=6pt,leftmargin=0pt,

```

```

249  innerrightmargin=6pt,innerleftmargin=0pt,
250  innertopmargin=0pt,innerbottommargin=0pt,
251  skipabove=0pt,skipbelow=0pt,
252  linewidth=2pt,
253  topline=false,bottomline=false,leftrule=false}
254 \makeatletter
255 \newcommand\ybQuote[3]{%
256   \ifthenelse{\isempty{#3}}{}{%
257     \ifx\hfuzz#2\hfuzz%
258       \index{#3}%
259     \else%
260       \index{#3, #2}%
261     \fi%
262   }%
263   \def\yb@body{%
264     \raggedright%
265     \ifx\hfuzz#3\hfuzz%
266       #1%
267     \else%
268       '#1'\\\raggedleft---#2 #3%
269     \fi%
270   }%
271   \ifdefined\yb@authordraft%
272     \begin{wrapfigure}{r}{0.4\textwidth}%
273       \begin{mdframed}[style=quoteodd]%
274         \yb@body%
275       \end{mdframed}%
276     \end{wrapfigure}%
277   \else%
278     \begin{wrapfigure}{o}[12pt]{0.4\textwidth}%
279       \sffamily\checkoddpage%
280       \ifoddpage%
281         \begin{mdframed}[style=quoteodd]\yb@body\end{mdframed}%
282       \else%
283         \begin{mdframed}[style=quoteeven]\yb@body\end{mdframed}%
284       \fi%
285       \vspace{-12pt}%
286     \end{wrapfigure}%
287   \fi%
288 }
289 \makeatother

```

Then, we use and configure `footmisc` as suggested [here](#):

```

290 \RequirePackage{perpage}
291 \RequirePackage[bottom,perpage,multiple]{footmisc}
292 \makeatletter
293   \let\yb@oldfootnote\footnote
294   \newcommand\yb@nexttoken\relax
295   \newcommand\yb@isfootnote{%
296     \ifx\footnote\yb@nexttoken\textsuperscript{,}\fi}
297   \renewcommand\footnote[1]{%
298     \yb@oldfootnote{#1}\futurelet\yb@nexttoken\yb@isfootnote}
299 \makeatother

```

\ybPrintBibliography Then, we define \ybPrintBibliography, to print a list of references:

```
300 \makeatletter
301 \newcommand{\ybPrintBibliography}[1] [Bibliography]{%
302   \AtNextBibliography{\small}%
303   \raggedright%
304   \ifdefined\yb@manuscript%
305     \setlength{\bibitemsep}{0pt}%
306     \newpage%
307     \begin{multicols}{2}%
308       {\setstretch{1.0}\printbibliography}%
309     \end{multicols}%
310   \else%
311     \setlength{\bibitemsep}{.2em}%
312     \printbibliography[heading=bibintoc,title={#1}]%
313   \fi%
314 }
315 \makeatother
```

Then, a few layout configurations at the beginning of the document:

```
316 \makeatletter
317 \AtBeginDocument{%
318   \raggedbottom%
319   \ifdefined\yb@authordraft%
320     \raggedright%
321   \fi%
322   \setlength{\topskip}{0mm}%
323   \setlength{\parindent}{0pt}%
324   \setlength{\fboxsep}{0pt}%
325   \setlength{\parskip}{6pt}%
326   \interfootnotelinepenalty=10000%
327 }
328 \makeatother
```

Finally, a few meta commands with default values:

```
329 \newcommand*{\thetitle}{\textbackslash{}thetitle}
330 \newcommand*{\thevolume}{}
331 \newcommand*{\thedate}{}
332 \newcommand*{\theversion}{\textbackslash{}theversion}
333 \newcommand*{\theauthor}{\textbackslash{}theauthor}
334 \newcommand*{\thereviewer}{\textbackslash{}thereviewer}
335
336 \endinput
```

## Change History

v0.1.0	General: Initial version . . . . .	3	v0.5.1	General: Added the usage of <code>inputenc</code> in order to ensure UTF-8 encoding for the sources. . . . .	3
v0.2.0	General: Started using l3build . . . . .	3	v0.6.0	General: The <code>apa</code> package option added, to enable APA citation style. . . . .	3
v0.3.0	General: The <code>pgfopts</code> package is now used to parse package options. . . . .	3	v0.6.2	\ybPrintBibliography: The <code>\ybPrintBibliography</code> command has an optional argument, which is the title of the chapter. . . . .	10
v0.4.0	<code>authordraft</code> : The package option <code>draft</code> renamed to <code>draft</code> . . . . .	2			
v0.5.0	General: The <code>sparse</code> package option added, to place every section in a new page. . . . .	3			

# Index

Numbers written in italic refer to the page where the corresponding entry is described; numbers underlined refer to the code line of the definition; numbers in roman refer to the code lines where the entry is used.
